We've provided you with the calorie information for each dish to help you make an informed choice. Children between 5-10 years old need around 1,800 calories a day. This will vary by age and level of activity, as some children will need less and some will need more. The calorie information for our menu is calculated from recipes, however, as all our dishes are prepared by hand, some variation may occur. Guidance permits a +/-20% variance on published calorie values. For latest information please visit our website.
