

LONDON GATWICK NOISE MANAGEMENT BOARD

Community Assembly

04 June 2025 | 10:00-12:00 [Online]

Agenda

1.	Welcome and Introduction	-
2.	Updates from NMB and Oversight Board	- The Oversight Board is keen to ensure the membership of the NMB is representative of the communities around London Gatwick (LGW). - Members are reminded that the ICR attends the Oversight Board and is happy to pose questions to the board on behalf of members.
3.	Briefing session planning - Updates from land use planning briefing - Upcoming briefings	Potential briefing topics: Operational context at LGW, Time-Based Separation and Advanced Mixed Mode at London Gatwick. - The Independent Community Representative (ICR) attended GATCOM and has raised the on-going conversation around land use planning around LGW. - Future briefings may be open to the wider NMB membership (including the Oversight Board).
4.	Programme Steering Group (PSG) - Project shortlisting and processes - Project updates	- The shortlisting process is an on-going conversation and the list of potential NMB projects is continuously maintained. Factors Affecting Aircraft Noise (FAAN): A report will be shared with NMB members once the project has completed. Members raised the A220 'Whale Sound' issue, which is with the DfT, who are providing updates to LGW, but this will not be included in the FAAN project. Community Noise Metrics (CNM): An engagement session was held to gather community insights on the most important metrics and noise impacts to consider. Further engagement is planned. Metrics will be developed by the NMB and the best way to utilise and monitor these will be considered by the end of the project. Noise Impacts of Late Running Aircraft (LRA): Data analysis is on-going and the project intends to understand the reasons behind why aircraft are arriving in the night despite being scheduled to land during the day.
5.	AOB	- The PSG will investigate the best way to capture records of engagement sessions such as project workshops, to benefit communities in their responses.

-	Key Actions	- The ICR is to send a link to the DfT's <i>Reform of Planning Committees Technical Conversation</i> following the Community Assembly. - The Secretariat will distribute the updated project shortlisting slides immediately following the Community Assembly. - The ICR will consider including an agenda item on updates to the A220 'Whale Sound' issue in the next Community Assembly. - An Advanced Mixed Mode (AMM) factsheet will be distributed before the next briefing session. - The PSG lead will engage with LGW to determine the possibility of a Time-Based Separation and ATC/Operational briefing before the next Community Assembly. - Annual noise contours have been published and a link has been shared with these notes. - CNM Engagement Questions and Notes are to be shared to the Community Assembly.
