

Oversight Board

Independently Chaired, the Oversight Board is made up of government, regulator, and industry representatives, our Air Navigation Service Provider, Representatives from our Consultative Committee, Community Member Attendees, the Independent Community Representative, London Gatwick representative, Expert Advisory Group, and the Programme Steering Group lead. The Oversight Board is the accountability authority over the Community Assembly and the Programme Steering Group. It is here that all noise related concerns, ideas, and projects are discussed and developed.

Community Assembly

Chaired by the Independent Community Representative, the Community Assembly is a place for our community members to come together to discuss noise related thoughts, ideas, and concerns. The Expert Advisors are also on hand to give subject specific information and guidance, and answer any airspace and noise questions our members might have. Discussions, requests, and key thoughts will be taken to the Oversight Board for wider discussion via the Independent Community Representative.

Programme Steering Group

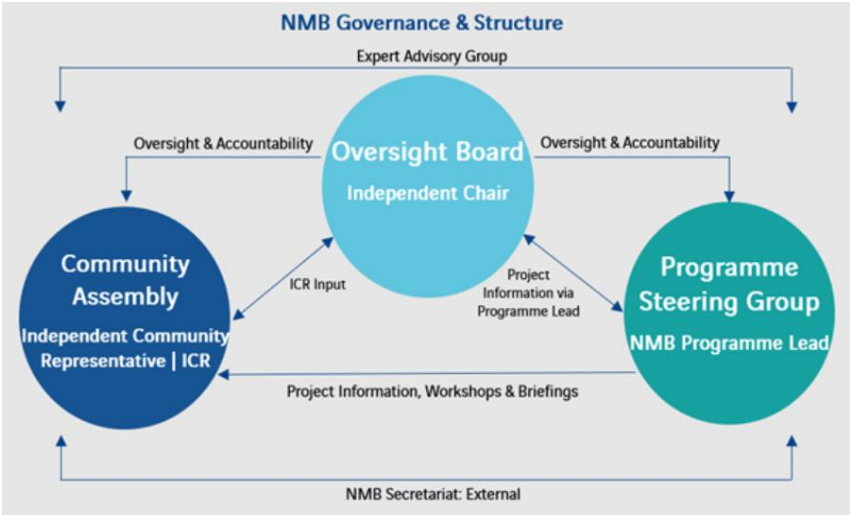

The core principles of the PSG are to keep the projects on track; bring together the priorities of industry, communities, and London Gatwick, to deliver balanced projects, which are beneficial to all; and realising project benefits and integrating them into industry upon completion.

NMB FACTSHEET

Welcome to the Noise Management Board

The NMB is formed of three groups - the Oversight Board, Community Assembly and Programme Steering Group - each with a specific role to oversee a programme of work, the aim of which is to identify, evaluate, and promote the adoption of strategic and innovative ways of managing noise impact, including but not limited to, quantifiably measurable reductions and improvements. The Board will work towards this aim through alignment with existing policy, regulation, and industry best practice.

Being a Member

We now welcome any of our neighbours to join the Noise Management Board, you do not need to belong to a noise action group, council, study group, or other. We welcome you whether you wish to learn more about what we do to manage aircraft noise and mitigate its impacts, have more of an influence on the projects we undertake, or just to keep abreast of the latest information.

You will join the Community Assembly, where you will have access to our Expert Advisory Group and our Independent Community Representative, and have the opportunity to attend the Oversight Board meetings as a Community Member Attendee. Our in-person Oversight Board meetings give you the chance to chat to some of our industry, government, and regulator colleagues over a cup of tea, and possibly learn a bit more around the technical side of the project planning.

The Project Steering Group Matrix of Consultation
