The **Project Approval & Governance Framework** sets out the Oversight Board as the accountability authority over the Project Steering Group. The PSG will deliver Checkpoint updates at each Oversight Board meeting for approval* and progression.

The **Checkpoint Assurance Framework** serves as the Control Point by which the Oversight Board assesses project outputs & benefits.

The **Project Delivery Model** sets out the process of a project lifecycle. Each project will follow the same steps, allowing for project variance where some steps may be more complex.

*approval is granted following scrutiny and discussion. Approval can be rejected on the basis of an *industry credible reason*, not an opinion.
